

EUR 2 Pallet

1200 x 1000 x 162

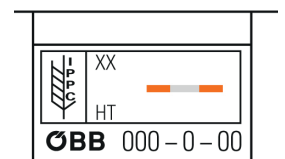

The EUR 2 pallet (1200 x 1000 x 162 mm) is sturdy, suitable for heavy loads and ideal for roller and chain conveyors thanks to its circumferential base frame. This pallet is mainly used in English-speaking countries. Quality-assured licensees ensure smooth processes in supply chains and automation. The global exchange system conserves resources and reduces CO₂ emissions.

Independent quality control

Accredited inspection organisations check compliance with the prescribed quality standards in accordance with UIC standard 435-5 (production) and UIC standard 435-4 (repair). The inspections are unannounced and documented.

Phytosanitary treatment

Compliance with the ISPM 15 standard is essential for the international movement of goods. Euro pallets are produced strictly in accordance with the IPPC specifications, although recognition varies from country to country. The plant protection authorities will provide further information.

Repair

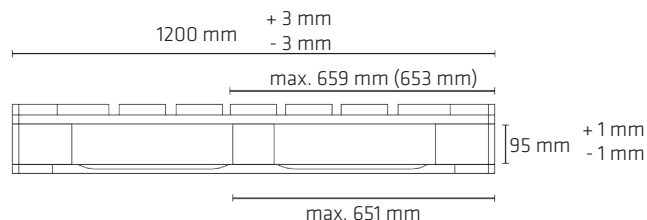

Defective EUR 2 pallets are repaired in EUR-certified facilities in an environmentally friendly manner. Each repaired pallet receives a repair identification nail with the company's logo and licence number.

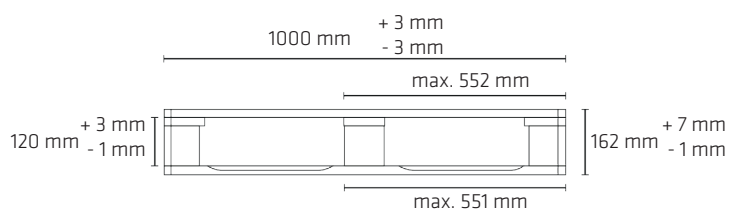

Technical data

- Manufactured in accordance with **UIC standard 435-5**
- **9-17-135**: 9 blocks (solid wood or moulded chipboard), 17 boards (9 top boards, 3 cross boards and 5 bottom boards), 135 quality nails
