

EUR/ÖBB Pallet Collar 1200 x 800 x 400

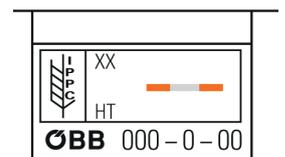

The EUR/ÖBB pallet collar is a standardised, exchangeable wooden frame for Euro pallets (1200 x 800 mm x 400 mm), which is ideal for the safe transport and storage of loose goods. The foldable version is also standardised, exchangeable and available in four heights (100-400 mm). Both pallet collars are stackable and can optionally be combined with a lid. They fulfil the requirements of the packaging ordinance.

Independent quality control

Accredited testing organisations check compliance with the prescribed quality standards in accordance with IRS 40435-2 (production). The inspections are unannounced and documented.

Phytosanitary treatment

Compliance with the ISPM 15 standard is essential for the unrestricted use of load carriers in international goods transport. EUR/ÖBB pallet collars are therefore produced strictly in accordance with IPPC specifications to ensure international usability. Recognition of the IPPC standard may vary from country to country. The plant protection authorities responsible can provide further information.

Repair

Defective pallet collars are repaired in all EUR-certified repair centres in an environmentally friendly and cost-effective manner. After the professional and independently quality-assured repair, each repaired pallet collar receives a repair identification nail with the logo of the testing organisation and the licence number of the repair company.

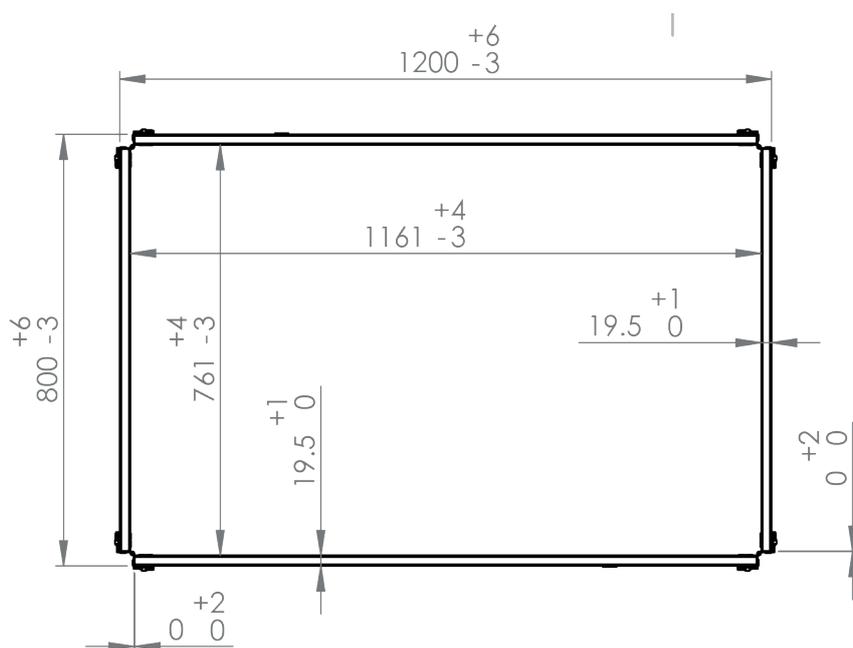

Technical data: Rigid EUR-ÖBB pallet collar

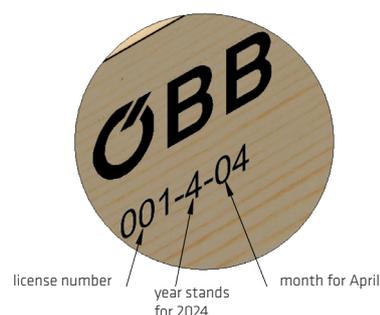

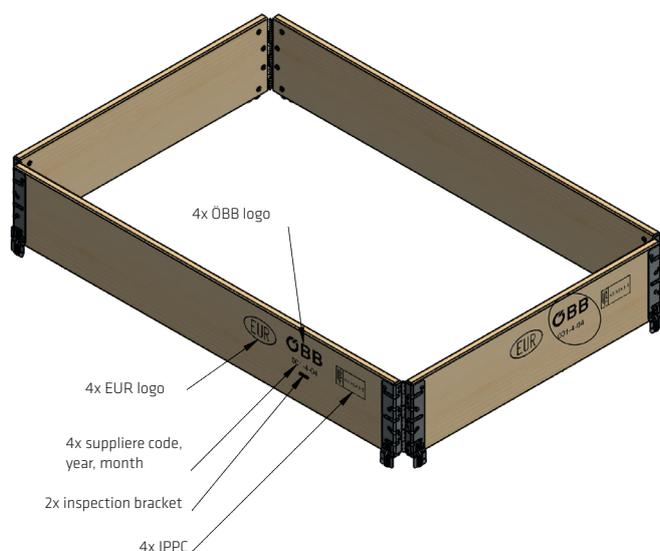

- Manufactured in accordance with **IRS 40435-2**
- **Dimensions** (L x W x H): 1200 x 800 x 400 mm
- **Weight:** approx. 20 kg
- 4 quality-tested hinges
- Number of rivets per IRS 40435-2

Technical data: Foldable EUR-ÖBB pallet collar

- Manufactured in accordance with **IRS 40435-2**
- **Dimensions** (L x W x H): 1200 x 800 x 100/200/300/400 mm
- **Weight:** Depending on the height of the frame (approx. 5 kg for a height of 200 mm)
- 4 quality-tested folding hinges
- Number of rivets per IRS 40435-2
