

EUR 3 Pallet

1000 x 1200 x 144

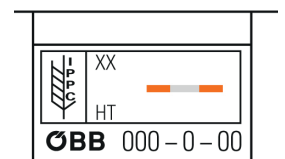

The EUR 3 pallet (1000 x 1200 x 144 mm) is ideal for heavy loads thanks to its sturdy construction. It is particularly widespread in Europe and on the Asian domestic market. Uniform quality standards and the selection of qualified licensees ensure their reliable use in supply chains and automated processes. The global exchange system saves resources and reduces CO₂ emissions.

Independent quality control

Accredited inspection organisations check compliance with the prescribed quality standards in accordance with UIC standard 435-5 (production) and UIC standard 435-4 (repair). The inspections are unannounced and documented.

Phytosanitary treatment

Compliance with the ISPM 15 standard is essential for the international movement of goods. Euro pallets are produced strictly in accordance with the IPPC specifications, although recognition varies from country to country. The plant protection authorities will provide further information.

Repair

Defective EUR 3 pallets are repaired in EUR-certified facilities in an environmentally friendly manner. Each repaired pallet receives a repair identification nail with the company's logo and licence number.

Technical data

- Manufactured in accordance with **UIC standard 435-5**
- **9-13-184:** 9 blocks (solid wood or moulded chipboard), 13 boards (7 top boards, 3 cross boards, 3 bottom boards), 184 quality nails
- **Dimensions:** 1000 x 1200 x 144 mm (L x W x H)
- **Weight:** approx. 30 kg
- **Load capacity:** 1,500 kg
